

DENYS ZAICHENKO

EXPERIENCE

Game Development Projects

- Hack and Slash Game — designed and implemented a scalable combat combo system, allowing easy addition of new light/heavy attack combinations without code changes, with a focus on flexible gameplay mechanics;
- Resident Evil-Inspired Prototype — developed a scalable inventory system with item classes and data-driven behaviors, enabling new items to be added without modifying code;
- Magic System Prototype — created a spell system based on combining magic stones, with a flexible structure for adding new stones and combinations without code changes, including core inventory and item interaction systems;
- Game Design Concepts — created game design documents (GDD) for original ideas, focusing on gameplay systems, mechanics, and player experience.

EDUCATION

Oles Honchar Dnipro National University

Computer engineering | sept 2021 - june
2025

- I have completed a Bachelor's degree in Computer Engineering, where I built a solid foundation in computer architecture, programming (C, C#, Python, SQL), and networking tools like Cisco Packet Tracer.
- My diploma project involved developing a hack and slash game, with a focus on gameplay mechanics, combat systems, and overall player experience.
